JIM CANTRELI GOLDIE OWENS COLLEGE

SOUNDS TRUE

"You have a college celevation, and now you are ready to go out and superintend somebody" seems to be the entionary remarks made to the grantine by his critical friends when last of their products to his critical friends when last if they are perintending, against the effects attained to the products, and what have you. For the most part, they are being "ingerintended." The cotlege randine cuming into the product of the pr

Many of the jiley fast at the innocent collegians are originated out of jealoussess and private thwarted ambitions. They picture him a blasted individual, confident of his superiority. Whether he has the high head or not, if hard not to see him in that light. They regret they are not failure to acquire a higher education and they chaft under the constant adjuce showered not them by people about them to go to cellege. They resent the topic of college. They tree the topic of cellege.

ir friends, and themselves a cation arises.

After all, they are sometimes right—thus strengthentheir views, but it is up to the graduate to show that
has gained out of his fouryears experience.

WILL YOU HELP

There is one thing this college could use to a good advantage and that is a NATATORHUM. No individual is going to give us such a thing, nor is the Legislature going to appropriate money for it, so it is left to the students to limit our own stating pool.

Just what would be the best way in raising money for anatorirum! Why not pay an extra treenty five cent fee each term when you register, and in two years we could half as aix thousand dollar natatorirum, of it we payed a fifty cent fee for two years we would pay for this entirettier and the natatorirum could be built within the

fifty cent tes to search and the natatorium could be built wrong structure and the natatorium could be built wrong structure and the natatorium could be seen a natatorium. If we lear counciling bath on other class or group of statement has ever done for the college. We would have a greater love and raspect for our add Alma Mater if we had really contributed to the veillare of the institution. We might not get the benefit of the nat now, but when our children come to school there will be something that mother and das left they suchers college in this state has some Almost every teachers college in this state has some Almost every teachers college in this state has some

and ded left them. Another solider in this state has some means of offering seasons and aphysical clusterion and for pleasure. He is true that we offer the same course, (such as it is). Let get industrious and build something for the college as well as for ourselves.

Everyone start talking this thing up. We can get it if we really want it. All County Chab discuss this thing at your meetings and lets get some immediate action on a NATATORIUM.

NEEDED CHANGE

Does the term "physical education" mean an exer-tor running around the building or football field. The this is defined here a person would think that is what term implies. A student comes to college, and is re-red to take physical obscation, mantly under the sec-tion of a vindent teacher. The student is sec-tion of a vindent teacher. The other is the first play hasticallal, baseball, or just plain running in

This type of surveise does not build up the student, in the surveise does not build up the student, in the surveise does not build up the student, in the surveise, it would be best to change the so-called "physical stion" course to a physical culture course. In other is, instead of learning down the headth of a student, it up.
